

ERGONOMICS Back Support

Durable, protective back support brace

BKBS

Brass Knuckle® BKBS

Back injuries account for 20% of all workplace injuries, costing the nation roughly \$20 – \$50 billion per year. It's the single largest category of injury.

Ideal Markets

Assembly | Construction | Dock Working | Electrical | Housekeeping | HVAC | Landscaping | Manufacturing | Mining | Shipping & Receiving | Warehouse | Weight Lifting

WE HAVE YOUR BACK. COMFORTABLE AND ADJUSTABLE SUPPORT BELT

Back fatigue and repetitive motion can lead to injury. The BKBS back support offers reinforcement that can help workers avoid back injuries and fatigue in occupations that require bending, stooping, lifting, carrying, or even holding static positions for a long period of time.

Brass Knuckle® recommends that facilities re-engineer their processes to eliminate lifting hazards. Remember, back supports are useful, but alone can't completely prevent injuries. Workers should be reminded to lift properly and to be aware of the risks of over-lifting; however, when all other precautions are taken, back supports can help control posture and promote positive lifting habits.

Carefully fitted and adjustable for girth and height, our supports feature elastic suspenders to distribute body stress and a tapered abdominal panels to better conform to body sizes.

ERGONOMICS

Back Support

Durable, protective back support brace

BKBS

1. Attached elastic suspenders distribute support throughout trunk. The 1.5" suspenders attach to belt to help ensure it remains firmly in place.
2. Offered in five sizes to aid in proper fit. Adjustable clips further customize support.
3. Abdominal support tapers to fit body.
4. Padding on sides and pressure-relieving low-back support in lumbar region helps increase comfort.
5. Rugged polyester/mesh elastic body has durable, double hook-and-loop closure system.

Brass Knuckle® BKBS

We designed the BKBS to wear comfortably, to inspire confidence and to relieve pressure, but also to serve as a reminder that the very act of lifting requires proper form. Using too much force, making awkward, repetitive motion and even holding static positions for too long can all be damaging to the back.

Part #	Size	Pack Sz	Color
BKBS-S	Small, 32" - 36"	Each	Black
