

SmartShell™ Hand Protection

BK199

Polyester/Cotton Shell,
Latex Impact-absorbing Pads/Dots

Brass Knuckle® BK199

The Bureau of Labor Statistics indicates that upper extremity injuries are the highest cause of work-related injuries that cause days away from work. This includes trunk, back and hand injuries. The right hand protection on the job can help reduce the risk of injuries.

Ideal Markets

Automotive | Construction | Facility Maintenance | Mechanics | Oil & Gas | Petroleum | Glass/Plastics | Processing | Refineries | Roofing | Warehouse

FLIP FOR FUNCTION AMBIDEXTROUS GRIP/IMPACT PROTECTION

With BK199, get twice the functionality from a single pair of gloves. This unique, flip-sided hand protection features raised blue latex dots on one side for a sure grip—and bone-shaped latex foam pads on the other side for back-of-the-hand impact protection. Or is it the other way around?

Wear the dots on the palm side for excellent anti-slip benefits without the “sweaty palm” feeling that a full palm and finger coating can cause. Or flip the protection by putting the gloves on the opposite hands, and the specially configured “bones” turn into a padded grip that still allows plenty of flexibility. With its reversible design, BK199 is ideal for warehouse work, construction, and more. And its lightweight, 7-gauge polyester/cotton shell offers breathability, flexibility, and comfort for all-day wear.

Does this mean that being two-faced is a good thing? You tell us.

SmartShell™ Hand Protection

BK199

Polyester/Cotton Shell,
Latex Impact-absorbing Pads/Dots

1. The lightweight, polyester/cotton shell provides extreme flexibility with a snug, comfortable fit.

2. When worn facing in, blue latex dots across palm and fingers offer flexibility and strong grip, without the trapped heat caused by a full palm coating.

3. Foam latex padded “bones” provide moderate impact protection for the back of the hand when worn on the outside, grip and cushioning when worn on the inside.

4. Ambidextrous—wear with the dots on the inside and impact protection on the outside—or switch to the opposite hands to reverse the protection.

5. Stretchy wrist provides custom fit that comfortably keeps debris out.

Brass Knuckle SmartShell™ BK199

Two-sided protection, to double glove functionality. One side provides small latex for palm and finger grip, while the flip side's impact-resistant padded “bones” offer impact protection on the outside, and padded great-grip bumps on the inside.
