

SmartFlex™ Hand Protection

BK420
Nylon Shell,
Foam Nitrile Coating

Brass Knuckle® BK420

Work gloves contaminated with oils, greases, coal tar, pitch, creosote or other irritants can cause contact dermatitis. Work-related skin diseases account for approximately half of occupational illnesses and an estimated 25 percent of all lost workdays. A resistant coating on work gloves provides critical protection and can reduce the total cost of safety programs.

Ideal Markets

Automotive | Construction | Facility Maintenance | Mechanics | Parts Handling | Oil & Gas | Petroleum | Processing | Refineries | Roofing | Small Parts Assembly | Warehouse

RUGGED AND COMFORTABLE FOR TOUGH, ABRASIVE, AND OILY JOBS

Ideal for projects requiring precision, Brass Knuckle® BK420 is the same comfortable-fitting, 13-gauge nylon, knit glove popularized by our 400 Series lineup, but then palm-coated in foam nitrile. The resulting sponge-like slip resistance is unlike any other, providing critical barrier protection to the wearer while also delivering excellent slip and abrasion. The nitrile coating is an ideal choice when enhanced grip is needed despite wet conditions — even oil.

With its classic black palm coating on a dark gray liner, this is a glove that encourages compliance with its unmatched fit and sleek appearance. But compare BK420 in price — this workhorse is a best-in-class value.

SmartFlex™ Hand Protection

BK420
Nylon Shell,
Foam Nitrile Coating

1. Nitrile coating on full fingers and palm.
The ideal choice for dry, wet, and oily applications, nitrile-coated gloves provide excellent resistance to tears, snags, abrasions, oils, and fuels.
2. Foam coating features millions of micropores that channel liquids away from the surface and, compared to smooth coatings, improves slip resistance.
3. The 13-gauge nylon shell fits snugly and ensures excellent dexterity.
4. Uncoated back and wrist improves ventilation.
5. Color-coded cuffs indicate glove size — simplify re-issuing.
6. Full knit wrist — seamless and stretchable — provides a snug fit and prevents dirt, debris, and cold from getting inside glove.

Brass Knuckle® SmartFlex™ BK420

We designed the SmartFlex™ BK420 general purpose work glove to be a tough protector. BK420 provides excellent performance and comfort while preventing oils from penetrating the glove, making it the workhorse of choice.
